

Services

Our distribution network covers three Indonesian provinces, providing access to all relevant channels in some of the most remote areas and islands across Bali, Nusa Tenggara Barat and Nusa Tenggara Timur. This makes us the company of choice for many manufacturers wishing to have their products distributed via our transport network and transfer routes.

Our primary distribution management goal is to maintain a steady supply of pharmaceuticals and equipment to facilities where they are needed, while ensuring that resources are being used in the most effective way. Our comprehensive infrastructure allows us to work with shorter turnaround times to meet urgent product delivery needs. We pride ourselves on the accuracy and reliability of our services.

We are highly proficient in the storage, supply and distribution of generic drugs and patented pharmaceuticals, health equipment, over-the-counter medical supplies, pest-control equipment, and medical food products.
